FLIGHT TIME TV

Flight Time TV broadcasts Real Time flight information to the hospitality industry. The up-to-date information can be displayed on guest TV networks and/or dedicated LCD TV's throughout the Hotel, through a dedicated FTTV application, HTML or XML feed.

Flight Time TV displays the National and International flight status of all Airports worldwide.

COMPANY BACKGROUND

Flight Time TV was created by Global Software Applications, the developers of SurferQuest internet kiosk software, Here2There Software and the Missing Children Screensaver. Currently, SurferQuest services more than 750 Hotel and Resort locations in the US, Canada, Europe, Jamaica and Australia. These properties include many 5 and 4 star /diamond properties such as The Wynn Las Vegas, The Umstead NC, Stein Eriksen Lodge Utah, The Westin Times Square, The Westin DC, The Westin Las Vegas and The Turtle Bay Resort in Hawaii. Most of them have been serviced by GSA since 2001.

DEPARTING TO	SCHED	FLIGHT	STATUS
Akron/Canton OH	3:46PM	Atlantic Southeast 694	Cancelled
Akron/Canton OH	3:46PM	Delta 4694	Cancelled
Allentown PA	2:55PM	Atlantic Southeast 795	On Time

DATA SOURCES

Most flight tracking applications use a single source of data - the US Federal Aviation Administration's (FAA) Aircraft Situation Display to Industry (ASDI) data feed. The ASDI data feed tracks flights primarily within the United States' controlled airspace and contains information for flights controlled by air traffic control. This can result in less than accurate information.

For this reason, Flight Time TV not only supplements FAA data, but also information from other sources including airport and airline data feeds, to give you both runway and gate times whenever possible. This secures the most accurate information available.

DATA FEED AND LAY-OUT

Flight Time TV distributes the information automatically to the Flight Time TV PC present at each Hotel, through the internet for immediate display.

The flight information shows:

- Destination
- Departure Time
- Flight#
- Airline
- Gate#
- Status

Flight Time TV shows all the flight departures between the next 2 and 5 hours. Depending on how far you are from the Airport, we can set this window to suit.

Flight Time TV brings the flight information of the nearest Airport straight into your Guest room

Fort Wayne Municipal Airport/Boer Field	17°F	UA 7196*	United Airlines
Bradley International Airport	17°F	UA 1114	United Airlines
Bradley International Airport	17°F	US 5850*	US Airways
Buffalo Niagara International Airport	15°F	UA 1142	United Airlines
